

FROM EDITORS

Dear Authors and Readers of Archives of Psychiatry and Psychotherapy

There is still deficit in the number of health care specialists dealing with child and adolescent psychiatry and in the subject literature, that could be a solid ground for the practitioners. Opening this Spring issue of archives of Psychiatry and Psychotherapy with a Thirty years' follow-up of depressive adolescents: a preliminary report, we warmly encourage to get acquainted with all the papers included in the 1/2017 issue, but also to refresh information from papers already published in *Psychiatria Polska* and *Archives of Psychiatry and Psychotherapy* concerning mental health of children and adolescents [1-7]
